

The Beauty Rooms
Autumn 2003

The end of calorie counting! Immune response testing - new weight loss programme now available!

The Beauty Rooms has become a regional centre for Immogenics, an international company that has recently launched its service in the UK. Their weight management programme is based on an entirely new understanding of the cause of excess weight, namely immune response to certain foods causing inflammation. This sophisticated new lifestyle programme based on the results of blood analysis measures an individual's inflammatory response to over 100 common foods and their derivatives. The company provides a fully supported bespoke diet programme for each customer based on eliminating those foods that cause an inflammatory reaction. If you would like to know more about this new service you can obtain information and booking details on www.immogenics.com or contact 0845 226 5858.
